### Comments:

Ms. Onyszko phoned [Non-releasable] the same day he left her a VM with the complaint. After speaking to him, she phoned [Non-releasable] who said he was not onsite that morning, but would ask onsite staff what could have caused the emissions. Ms. Onyszko asked permission, and sent one of [Non-releasable] photos to [Non-releasable]. On 05/09/14 [Non-releasable] phoned Ms. Onyszko and told her the emissions were due to a 'dust boss' on site that operates like a snow-making machine, except with water to control dust emissions. Ms. Onyszko phoned [Non-releasable] to relay this information to him, but he maintains that what he saw was smoke and not a water mist. Ms. Onyszko told him that, weather and time permitting, she would drive by the site on 05/12/14 after she was done with a inspection scheduled for that morning.
